

Call for papers

The Organising Committee welcomes cutting-edge presentations focusing on:

Exposure assessment - Sampling and air monitoring strategies
Peak exposures
Air exposure estimation and modeling in REACH
Nano-aerosol sampling and measurements
Pumped and diffusive sampling of organic and inorganic gases
Sampling and measurement of inorganic, organic and biological aerosols
Sampling and measurements of mixed phases
Chemical speciation of exposure
Uncertainties - Quality of measurements
Biological monitoring - Biomarkers of exposure

Participants are cordially invited to submit contributions dealing with the conference topics. A one-page abstract must reach the conference secretariat by **2 May 2011**. When you submit your abstract(s), please state your preferred form of presentation (oral or poster).
